

Cliff Drive Workshop Held

Community members discuss Cliff Drive

On October 17, around 60 community members attended the Cliff Drive Vision Zero Approach Workshop to discuss proposed safety improvements for the Cliff Drive corridor. Over the years, the Mesa community has shared with the City its desire for safer crosswalks, better cycling facilities, and an overall safer Cliff Drive. Increasing safety along Cliff Drive aligns with the City's Vision Zero Strategy, which seeks to eliminate all serious injuries and deaths on our roads.

Interested in learning more about the proposed solutions? Attend the upcoming Transportation and Circulation Committee meeting on October 24, when the Cliff Drive improvements will be presented for further input. Visit www.SantaBarbaraCA.gov/TCC to find out more.
